Job Description
iCOVER

iCOVER specializes in Wholesale of Background Screening & Business Intelligence solutions for the global market. We are an international company with operational headquarters in Paris, backed by a network of offices worldwide, which offer strategic global reach for all your business needs.

Our expertise lies in data collection, research & verification of information, analysis, and reporting. Our clients know that we are diligent, always prepared to go the extra distance to deliver compliant, accurate and timely results. Our service is dedicated, professional and reliable.

Currently, for our team in Sofia and Plovdiv, we are looking for a:

React JS Developer

The primary focus will be on developing user interface components and implementing them following well-known React JS workflows. The person on the role will ensure that these components and the overall application are robust and easy to maintain. What's expected is to coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

Responsibilities

- Writing application interface codes using JavaScript following react.js workflows.
- Developing new user-facing features using React JS, HTML, CSS
- Building reusable components and front-end libraries for future use
- Translating designs and wireframes into high quality code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Meeting with the development team to discuss user interface ideas and applications.
- Working closely with QA specialists, Project managers and UI/ UX designers to create effective user interfaces
- Reviewing application requirements and interface designs.

- Identifying web-based user interactions.
- Troubleshooting interface software and debugging application codes.
- Developing and implementing front-end architecture to support user interface concepts.
- Monitoring and improving front-end performance.
- Documenting application changes and developing updates.

Requirements

- 3+ years of experience in hands-on web applications development using React JS
- 2+ years professional experience building React applications with RESTful APIs
- Good knowledge of microservice architecture
- Knowledge of REST design principles
- Understanding of server-side logic and front-end performance optimization
- Experience with a state management library like redux, mobx, react-query, etc.
- Good understanding of asynchronous programming and its workarounds
- Strong self-motivation, "can-do" and problem-solving attitude
- Deep understanding of HTML5 semantics, CSS3 (sass), box-model / flex-box
- Experience with jQuery;
- Experience with Git and Git flow

What's in it for you
- Fun and dynamic team;
- Excellent remuneration package and work-life balance;
- Additional paid leave;
- Flexible working hours;
- Food vouchers;
- Additional medical insurance;
- Public transportation allowance;
- Annual bonus;
- Multisport discount;
- "Bring a friend" bonus model;
- Awesome class A office.
